Product Description

The CID X-Treme Post Driver is a dependable post driving attachment for operators looking to get the job completed in a timely manner for an excellent cost. These breaker style post drivers use a proven nitrogen charged power cell, steel plate frame, and high strength steel domed head to put posts in the ground in a fraction of the time it takes to set posts with a conventional post hole digger. Offered in the skid steer or excavator mounts, ready to go when received.
