Product Description

CID Pallet Forks & Frame

Anyone that owns a skid steer should have a set of forks on hand. Forks are ideal for lifting pallets, loading lumber or just about anything else. Our forks are completely heat treated and rated to carry 3,000-5,500 lbs depending on your type of hookup. We put a step on both sides of our frames so the operator can easily climb into the cab. We offer a large variety of ranges included here such as heavy duty, walk-thru, JD, fork grapple, hydraulic heavy duty, etc. Euro Style, John Deere, and other mounts available. Generally speaking: Tine sizes

range from: 36-96" largely depending on weight rating, and size of the frame you buy.
