Product Description

CID X-Treme Duty Tree Reaper

The CID X-treme Tree Reaper combines strength and efficiency. The Tree Reaper has a sleek tapered deck for a slim angled cut and sturdy push bar design. The Tree Reaper can use a 16-26 GPM Gerotor Motor (no case drain required) providing a 5" cutting capacity, a 17-30 GPM Bent Axis Piston Motor (case drain required) providing a 7" cutting capacity, and a 30-48 GPM Bent Axis Piston Motor (case drain required) providing a 10" cutting capacity. This cutter features replaceable skid shoes, three AR400 non-welded blades, and optional mulching teeth for 16-26 GPM and 17-30 GPM models. Mulching teeth come standard on the 30-48 GPM models. This machine is by far one of our favorite attachments and for good reason!
