Product Description

IronCraft 4400 Series: 6' Professional Offset Grader Blade

The **IronCraft 4406** is a high-performance **72" Offset Grader Blade** engineered for tractors between **35 and 60 horsepower**. This 6-foot rear blade is the ultimate choice for moving topsoil, grading gravel, and clearing snow, offering advanced mechanical flexibility that standard blades simply cannot provide.

Built for industrial-scale reliability, the 4400 Series is **Category 1 Quick Hitch compatible**. Its standout feature is its **triple-axis adjustability**, allowing for precise control over the blade's angle, tilt, and lateral offset—essential for professional ditching, road crowning, and bank maintenance.

Precision Maneuverability & Key Features

- **Triple-Axis Control:** Features a 5-position angle adjustment, a 3-position tilt adjustment, and a 5-position offset adjustment for unmatched grading precision.
- **Lateral Offset Capability:** The 5-position offset allows you to swing the blade outside the tractor's tire path, making it ideal for grading alongside fence lines, buildings, or steep embankments.
- **Heavy-Duty Moldboard:** A 15-1/2" tall blade constructed from 3/16" thick steel ensures excellent material rolling and high-capacity moving.
- **6-Foot Clearing Path:** The 72" width easily covers the footprint of mid-sized utility tractors, ensuring a clean finish in every pass.

Technical Specifications (Model 4406)

- **Working Width:** 72" (6 Feet)
- **Horsepower Requirement:** 35 - 60 Engine HP
- **Weight:** 340 lbs for aggressive soil penetration
- **Hitch Type:** Category 1 (Cat 1) Quick Hitch Ready
- **Cutting Edge:** 6" Reversible High-Carbon Steel

Industrial Build Quality

- **A-Frame Construction:** Reinforced 3/8" steel A-frame for maximum structural integrity under high loads.
- **Blade Versatility:** 5-position angle adjustment works in both forward and reverse operation.

- **Moldboard Material:** High-durability 3/16" steel thickness.
- **Adjustability:** Manual 3-position tilt for ditching and sloped grading.

Specialized Grading Applications

- **Road & Driveway Crowning:** Easily create a center peak on gravel roads to ensure proper water runoff.
 - **Ditching & Bank Management:** Combine the offset and tilt functions to clear drainage ditches while keeping the tractor on level, stable ground.
 - **Precision Edging:** Offset the blade to scrape right up against foundations, retaining walls, or fence posts.
 - **Winter Maintenance:** The 6-foot width and high moldboard make quick work of clearing heavy snow from parking areas and farm lots.
-
