Product Description

IronCraft 6100 Series: 12" One-Bottom Moldboard Plow

The **IronCraft 6112** is a rugged **12-inch One-Bottom Moldboard Plow** engineered for primary tillage on hobby farms, nurseries, and large gardens. Designed for tractors between **18 and 50 horsepower**, this single-bottom plow is the essential tool for turning over sod, aerating the soil, and creating the perfect environment for wild game food plots.

Built for longevity and performance, the 6100 Series excels at burying surface residue to enrich the soil profile. With **replaceable shares and moldboards**, this plow ensures you can maintain a sharp, effective cutting edge season after season, making it a reliable staple for any small-scale agricultural operation.

Key Features & Tillage Benefits

- **Primary Tillage Excellence:** Efficiently turns over topsoil to kill weeds and aerate the earth for superior seedbed preparation.
- **Replaceable Components:** Both the plow share and the moldboard are replaceable, significantly extending the service life of the implement.
- **Shear Bolt Protection:** Designed with a shear bolt safety system to protect your tractor's drivetrain and the plow frame if an underground obstruction is struck.
- **Residue Management:** Expertly buries crop residue or organic matter to speed up decomposition and return nutrients to the soil.

Technical Specifications (Model 6112)

- **Plow Type:** One-Bottom (Single Bottom) Moldboard Plow
- **Share Length:** 12"
- **Horsepower Requirement:** 18 - 50 Engine HP
- **Weight:** 215 lbs for effective soil penetration
- **Product Family:** IronCraft 6100 Series

Build Quality & Durability

- **Moldboard Design:** Shaped to provide maximum soil inversion and "curl" for clean furrows.
- **Frame Strength:** Built with heavy-duty steel to withstand the stresses of breaking new ground.

- **Maintenance Friendly:** Simple bolt-on replacement parts reduce downtime during the planting season.

Common Tillage Applications

- **Garden & Nursery Prep:** Ideal for breaking ground in new garden plots or nursery rows.
 - **Wild Game Food Plots:** Perfect for hunters and land managers looking to establish food plots in remote or wooded areas.
 - **Hobby Farming:** A versatile tool for small-acreage farmers needing reliable primary tillage.
 - **Soil Aeration:** Helps break up compacted soil layers to improve water drainage and root penetration.
-
