Product Description

IronCraft 6200 Series: 14" Two-Bottom Moldboard Plow

The **IronCraft 6214** is a high-efficiency **14" Two-Bottom Moldboard Plow** designed for tractors between **18 and 50 horsepower**. This double-bottom plow is the perfect solution for primary tillage on hobby farms, nurseries, expansive gardens, and wildlife food plots.

Engineered to double your productivity, the 6200 Series features two 14-inch shares that work in tandem to invert soil, bury surface residue, and aerate the ground for optimal planting conditions. Built for durability and safety, this model includes **shear bolt protection** to safeguard your equipment against underground obstructions.

Key Features & Performance Benefits

- **Dual-Bottom Efficiency:** Features two 14-inch plow shares, allowing you to turn twice the soil in a single pass compared to single-bottom models.
- **Replaceable Wear Components:** Equipped with replaceable shares and moldboards, ensuring long-term serviceability and consistent cutting performance.
- **Superior Soil Inversion:** Specifically designed to bury crop residue, weeds, and organic matter deep into the soil to improve nutrient cycling.
- **Safety-First Design:** Integrated shear bolt protection prevents damage to the plow frame and tractor 3-point hitch if a rock or root is encountered.

Technical Specifications (Model 6214)

- **Plow Share Length:** 14 Inches (Two-Bottom Configuration)
- **Horsepower Requirement:** 18 - 50 Engine HP
- **Total Weight:** 366 lbs for excellent soil penetration and stability
- **Product Family:** 6200 Series Heavy-Duty Tillage
- **Component Type:** Replaceable Share and Moldboard

Versatile Tillage Applications

- **Wildlife Food Plots:** Efficiently break through sod and compacted earth to establish nutritious plots for deer and turkey.

- **Large-Scale Gardening:** Ideal for preparing expansive garden rows by aerating the soil and burying weeds.
 - **Nursery & Specialty Farming:** Provides the precision and depth control required for nursery bed preparation.
 - **Primary Ground Breaking:** The heavy 366 lb frame ensures the shares stay in the ground, even when tackling tough, undisturbed soil.
-
