Product Description

IronCraft 6200 Series: 16" Two-Bottom Moldboard Plow

The **IronCraft 6216** is a high-efficiency **16-inch Two-Bottom Moldboard Plow** engineered for tractors between **18 and 50 horsepower**. This 2-bottom configuration allows you to double your productivity during primary tillage, making it the perfect choice for hobby farms, nurseries, and large-scale wildlife food plots. Designed to penetrate and invert the soil profile, the 6200 Series ensures superior aeration and effective residue burial. Whether you are breaking new ground or preparing a seasonal seedbed, this plow provides the structural integrity and **shear bolt protection** required for demanding agricultural tasks.

Key Tillage & Performance Features

- **Dual-Bottom Efficiency:** Features two 16" plow shares to cut and turn more soil in a single pass compared to standard one-bottom models.
- **Primary Tillage Excellence:** Engineered to turn over sod and bury crop residue, effectively aerating the soil and improving nutrient availability.
- **Replaceable Wear Parts:** Equipped with replaceable high-carbon steel shares and moldboards to ensure long-term serviceability and consistent performance.
- **Shear Bolt Protection:** Includes an integrated safety shear bolt system to protect your tractor's drivetrain and the plow frame from underground obstructions.

Technical Specifications (Model 6216)

- **Plow Share Length:** 16 Inches (Two Bottoms)
- **Horsepower Requirement:** 18 - 50 Engine HP
- **Total Weight:** 374 lbs for enhanced soil penetration
- **Safety:** Shear Bolt Protected
- **Maintenance:** Fully replaceable shares and moldboards

Agricultural & Land Management Applications

- **Hobby Farming:** Ideal for preparing larger acreage for vegetables, grains, or specialty crops.
- **Wildlife Food Plots:** Efficiently break up compacted soil in wooded areas or clearings to establish high-yield food plots.

- **Nursery Operations:** Maintain clean, aerated rows for tree and shrub production.
 - **Sod Inversion:** The perfect tool for converting existing pasture or grass-covered areas into productive garden or farm land.
-
