Product Description

IronCraft 7100 Series: 4' Angle Frame Disc Harrow

The **IronCraft 7112** is a durable and efficient **48" Angle Frame Disc Harrow** engineered for compact tractors between **20 and 30 horsepower**. This 4-foot harrow is the ultimate tool for residential landscaping, small garden maintenance, and preparing wildlife food plots for planting.

Designed to aggressively open and break up the soil surface, the 7100 Series creates the ideal environment for seed germination. This model is **Category 1 Quick Hitch compatible**, ensuring a fast and secure connection to your tractor's 3-point hitch.

Key Soil Preparation & Performance Features

- **Aggressive Notched Discs:** Equipped with 12 notched 16-inch blades that easily slice through residue and break up compacted topsoil.
- **Cast Iron Bearings:** Built with heavy-duty cast bearings for reliable rotation and long-term durability in various soil conditions.
- **Precision Disc Spacing:** Features a 7-1/2" blade spacing, optimized for creating a fine, level seedbed in fewer passes.
- **Compact Maneuverability:** The 48-inch working width allows you to navigate tight spaces in wooded areas or small nurseries with ease.

Technical Specifications (Model 7112)

- **Working Width:** 48" (4 Feet)
- **Horsepower Requirement:** 20 - 30 Engine HP
- **Disc Configuration:** 12 Notched Blades (16" size)
- **Weight:** 391 lbs for effective soil penetration
- **Hitch Compatibility:** Category 1 (Cat 1) Quick Hitch Ready

Versatile Land Management Applications

- **Wildlife Food Plots:** The perfect size for establishing hunting plots in remote or timbered areas.
- **Small Gardens & Nurseries:** Effortlessly cultivate soil for vegetable gardens or nursery rows.
- **Residential Landscaping:** Ideal for leveling topsoil and preparing new lawns for seeding.

- **Seedbed Finishing:** Use after plowing to pulverize clods and create a smooth surface for planting.
-
