Product Description

IronCraft 7100 Series: 5' Angle Frame Disc Harrow

The **IronCraft 7116** is a rugged and efficient **60" Angle Frame Disc Harrow** engineered for tractors between **25 and 40 horsepower**. This 5-foot harrow is the ideal primary tillage tool for residential landscaping, nurseries, small-scale hobby farms, and the cultivation of wildlife food plots.

Designed to aggressively open and break up the soil surface, the 7116 excels at preparing a smooth, ready-to-plant seedbed. This model is **Category 1 Quick Hitch compatible**, ensuring a fast and secure connection to your compact tractor for immediate field use.

Key Soil Preparation & Performance Features

- **Aggressive Notched Discs:** Features 16 notched disc blades that easily slice through surface residue and break up compacted topsoil for superior aeration.
- **Cast Bearing Durability:** Equipped with heavy-duty cast iron bearings to ensure long-term reliability and smooth blade rotation under consistent load.
- **Optimized Blade Spacing:** Blades are spaced at 7-1/2" to provide the perfect balance between soil pulverization and material flow.
- **Solid Ground Penetration:** With a total weight of 502 lbs, this harrow provides the necessary down-pressure to bite into tough ground without excessive bouncing.

Technical Specifications (Model 7116)

- **Working Width:** 60" (5 Feet)
- **Horsepower Requirement:** 25 - 40 Engine HP
- **Disc Configuration:** 16 High-Strength Notched Blades
- **Disc Blade Size:** 16" Diameter
- **Operating Weight:** 502 lbs
- **Hitch Type:** Category 1 (Cat 1) Quick Hitch Compatible

Primary Land Management Applications

- **Wildlife Food Plots:** Quickly prepare soil in wooded clearings or small fields for optimal seed germination.

- **Nursery & Garden Prep:** Easily break up cultivated topsoil to create a fine, level finish for planting rows or flower beds.
 - **Residential Landscaping:** Ideal for leveling soil after construction or preparing areas for new sod and seeding.
 - **Soil Aeration:** Use the notched blades to redistribute nutrients and oxygenate the topsoil layer for healthier plant growth.
-
