Product Description

IronCraft 7300 Series: 5' Heavy-Duty Tube Frame Disc Harrow

The **IronCraft 7316** is a **60" Tube Frame Disc Harrow** engineered for tractors between **30 and 40 horsepower**. This 5-foot harrow is built for medium-duty performance, making it the premier choice for commercial landscapers, large-scale nurseries, and small farms that require a more robust tillage tool than standard angle-frame models.

Featuring a high-strength tube steel frame for increased rigidity, the 7316 is **Category 1 Quick Hitch compatible**. Its heavy-duty construction ensures superior ground penetration, allowing you to break up compacted topsoil and prepare professional-grade seedbeds with fewer passes.

Performance-Driven Engineering Features

- **Sealed Bearings:** Equipped with premium sealed bearings that protect against dirt, dust, and moisture, significantly reducing maintenance time and extending the life of the disc gangs.
- **Rugged Tube Frame:** The 7300 Series features a reinforced tube steel frame that provides the mass and durability needed for consistent soil engagement.
- **Aggressive Notched Discs:** Features 16 notched disc blades designed to aggressively slice through surface residue, stalks, and heavy clods for a finer soil finish.
- **650 lb Operating Weight:** The substantial weight of this unit provides the necessary down-pressure to bite deep into cultivated topsoil without the need for additional weights.

Technical Specifications (Model 7316)

- **Working Width:** 60" (5 Feet)
- **Horsepower Requirement:** 30 - 40 Engine HP
- **Disc Configuration:** 16 High-Carbon Notched Blades
- **Blade Size Options:** 16" or 18" Disc Blades
- **Disc Blade Spacing:** 7-1/2" for optimal soil flow
- **Hitch Type:** Category 1 (Cat 1) Quick Hitch Ready

Industrial & Agricultural Applications

- **Commercial Landscaping:** Ideal for site preparation and leveling large residential or commercial

properties prior to seeding or sodding.

- **Professional Nurseries:** Efficiently maintain soil aeration and weed control in large-scale nursery rows and garden plots.
 - **Small-Scale Farming:** A reliable primary tillage tool for small acreage, vegetable farms, and specialty crop production.
 - **Wildlife Food Plots:** The heavy-duty frame is perfect for creating high-yield food plots in remote areas with tough, unbroken soil.
-
