Product Description

IronCraft 8200 Series: 5' Core Plug Aerator Attachment

The **IronCraft 8205** is a high-performance **60" Core Plug Aerator** engineered to revitalize turf and relieve deep-soil compaction. This 5-foot model is the ideal size for large residential estates, athletic complexes, and municipal parks, providing the necessary aeration to transform hard, stunted ground into a lush, thriving landscape.

Designed for versatility, the 8205 is **Category 1 3-point hitch compatible**, making it a perfect match for most compact and utility tractors. By removing uniform soil cores, this implement creates a direct pathway for air, water, and nutrients to penetrate the root zone, significantly reducing water runoff and promoting vigorous plant health.

Professional Turf Health & Aeration Benefits

- **Compaction Relief:** Physically removes plugs of soil to allow the ground to expand and breathe, fostering deeper root development.
- **Optimal Nutrient Delivery:** Opens the soil surface so that fertilizers, lime, and compost can reach the subsurface roots directly.
- **Superior Water Management:** Maximizes water absorption and prevents wasteful runoff on sloped or clay-heavy terrain.
- **Oxygen Exchange:** Facilitates the gas exchange required for healthy soil microbes and resilient plant respiration.

Technical Specifications (Model 8205)

- **Working Width:** 60" (5 Feet)
- **Weight (Empty):** 429 lbs for easy transport and maneuverability.
- **Weight (Water Filled):** 692 lbs for maximum penetration in dry, compacted, or heavy soils.
- **Hitch Type:** 3-Point Mount
- **Hitch Compatibility:** Category 1 (Cat 1)

Versatile Ground Care Applications

- **Large Residential Estates:** Maintain a professional, golf-course-quality lawn across multiple acres.

- **Athletic Fields & Playgrounds:** Combat the severe soil compaction caused by frequent foot traffic and sports activities.
 - **Municipal Golf Courses:** Keep fairways and roughs healthy and green with consistent seasonal aeration.
 - **Pasture & Small Farm Use:** Improve the forage quality of pastures by ensuring moisture reaches the grass roots during peak growing seasons.
-
