Product Description

IronCraft 8200 Series: 6' Heavy-Duty Core Plug Aerator

The **IronCraft 8206** is a high-capacity **72" Core Plug Aerator** engineered to revitalize large turf areas and eliminate deep-soil compaction. This 6-foot model is the professional choice for athletic fields, municipal golf courses, expansive residential estates, and agricultural applications where soil health is a priority.

Designed for maximum efficiency, the 8206 is **Category 1 3-point hitch compatible**. By extracting consistent soil cores, this implement creates a direct pathway for oxygen, water, and vital nutrients to reach the root zone, significantly reducing water runoff and promoting a lush, resilient landscape.

Industrial Turf Health & Performance Benefits

- **Maximum Compaction Relief:** Removes physical soil plugs to allow compacted ground to expand, fostering deeper and stronger root systems.
- **Enhanced Nutrient Absorption:** Provides a clear channel for fertilizers, lime, and top-dressing to reach the subsurface roots immediately.
- **Professional Water Management:** Maximizes moisture retention and prevents wasteful runoff on hard-packed or sloped terrain.
- **Improved Gas Exchange:** Facilitates the essential "breathing" process of the soil, encouraging healthy microbial activity and plant respiration.

Technical Specifications (Model 8206)

- **Working Width:** 72" (6 Feet)
- **Weight (Empty):** 490 lbs for easy transport and maneuverability.
- **Weight (Water Filled):** 806 lbs for maximum penetration in the toughest, most compacted clay soils.
- **Hitch Type:** 3-Point Mount
- **Hitch Compatibility:** Category 1 (Cat 1)

Commercial & Agricultural Applications

- **Athletic Complexes & Stadiums:** Maintain safe, high-performance playing surfaces by relieving the severe compaction caused by frequent heavy foot traffic.
- **Municipal Parks & Golf Courses:** Keep large fairways and public green spaces healthy and vibrant

throughout the growing season.

- **Large Residential Estates:** Achieve a professional finish across massive acreage with a 6-foot wide working path.
 - **Small-Scale Farming & Pastures:** Increase forage yields by aerating pastures to help grass compete with invasive weeds and better absorb rainfall.
-
