Product Description

IronCraft 9300BU Series: Heavy-Duty Round Bale Unroller

The **IronCraft 9300BU** is a versatile and rugged **Tractor Bale Unroller** engineered for farming and ranching operations. Designed to work with tractors ranging from **35 to 125 HP**, this implement streamlines the process of lifting, transporting, and unrolling round bales to ensure even feeding and bedding distribution across your pastures.

Built for industrial-scale reliability, the 9300BU is **Category 1 and 2 Quick Hitch compatible**. It is a dual-purpose tool that allows you to move hay without a spear and unroll it with precision, reducing hay waste and protecting your herd's nutritional intake.

Key Performance & Handling Features

- **High-Capacity Lifting:** Engineered to safely handle large round bales weighing up to **2,200 lbs.**
- **Adjustable Bale Widths:** Features an adjustable design that accommodates **4', 5', and 6' wide bales**, providing the flexibility needed for different hay sources.
- **Hydraulic Precision:** Comes standard with **cylinders and hoses**, allowing for seamless operation from the tractor seat.
- **Integrated Storage Stand:** Includes a built-in stand to keep the implement upright and protected when not in use, making hook-ups faster and safer.

Technical Specifications (Model 9300BU)

- **Maximum Lift Capacity:** 2,200 lbs
- **Horsepower Requirement:** 35 - 125 HP
- **Hitch Compatibility:** Dual Category 1 & 2 (Cat 1 & 2)
- **Operating Weight:** 375 lbs
- **Hydraulics:** Cylinder and Hoses included as standard equipment

Build Quality & Operational Design

- **Quick Hitch Ready:** Designed for easy attachment to modern Category 1 and Category 2 three-point systems.
- **Durable Frame:** Built with high-strength steel to provide years of service in demanding ranch

environments.

- **Time-Saving Operation:** Eliminates the need for manual pitchfork work by automating the hay distribution process.

Primary Ranching Applications

- **Winter Feeding:** Unroll hay in long rows to allow multiple head of cattle to eat simultaneously without crowding at a feeder.
 - **Pasture Management:** Distribute organic matter and seeds across the field by unrolling hay in different locations each day.
 - **Herd Bedding:** Quickly lay out clean straw or low-quality hay for calf bedding in cold weather.
 - **Efficient Hay Transport:** Use the heavy-duty arms to lift and move bales from storage to the field without a dedicated bale spear.
-
