Product Description

IronCraft 9500 Series: 180 Poly Hopper 3-Point Spreader

The **IronCraft 9510P-IC** is a high-performance **180-capacity Poly Hopper Spreader** designed for precise nutrient and seed application. Built for compatibility with **Category 1 3-point hitches**, this versatile attachment is the ideal solution for maintaining healthy pastures, food plots, and expansive lawns.

Unlike traditional steel hoppers, the 9510P-IC features a durable, **corrosion-resistant polyethylene hopper** that stands up to the harsh chemicals found in granular and crystalline fertilizers. Whether you are overseeding in the spring or fertilizing in the fall, this spreader ensures a consistent, professional-grade broadcast every time.

Precision Broadcasting & Performance Features

- **Durable Polyethylene Construction:** The "Poly" hopper eliminates rust and corrosion issues, extending the life of your equipment even when used with aggressive fertilizers.
- **Even Distribution Disc:** Equipped with a high-velocity spreading disc featuring adjustable fins to ensure an even throw across your entire field.
- **Granular & Crystalline Compatibility:** Engineered to handle a wide range of materials, from fine grass seed to heavy-duty granular fertilizers, without clogging.
- **Reliable PTO Drive:** Synchronized with your tractor's power take-off for consistent spread widths and application rates.

Technical Specifications (Model 9510P-IC)

- **Product Family:** IronCraft 9500 Series
- **Hopper Type:** High-Density Polyethylene (180 Capacity)
- **Hitch Compatibility:** Category 1 (Cat 1) 3-Point Hitch
- **Spreading Mechanism:** Multi-Fin Steel Disc
- **Material Application:** Suitable for Seed, Fertilizer, and Pelleted Lime

Versatile Field & Property Applications

- **Pasture & Field Fertilization:** Maintain optimal soil nutrients for livestock forage and hay production.
- **Food Plot Management:** The perfect size for hunters and land managers looking to establish precise

wildlife food plots.

- **Large-Scale Seeding:** Efficiently broadcast grass seed over new construction sites or established acreage.
 - **Winter Ice Control:** Can be used with dry sand or salt for managing icy driveways and private roads during the winter months.
-
