Product Description

IronCraft 9500 Series: 500 Capacity Poly Hopper 3-Point Spreader

The **IronCraft 9520P-IC** is a heavy-duty **500 capacity Poly Hopper Spreader** engineered for high-volume fertilizer and seed application. Designed for **Category 1 3-point hitches**, this large-scale spreader allows operators to cover more acreage in less time, making it the premier choice for professional farmers, ranchers, and land managers.

Equipped with a high-density, **corrosion-resistant polyethylene hopper**, the 9520P-IC is built to withstand the caustic nature of granular and crystalline fertilizers. Unlike standard steel units that rust over time, this "poly" hopper ensures a long service life and smooth material flow, even in humid conditions.

Industrial-Scale Performance & Features

- **High-Capacity 500 lb Hopper:** Spend more time spreading and less time refilling. The 500-unit capacity is perfect for large pastures, commercial turf, and regional park maintenance.
- **Corrosion-Proof Construction:** The polyethylene hopper is impervious to chemical fertilizers and moisture, ensuring your equipment stays in top condition for years.
- **Precision Broadcast Disc:** Features a specialized multi-fin spreading disc that ensures an even, consistent throw across a wide radius.
- **Variable Rate Control:** Easily adjust the flow rate to handle everything from fine grass seed to heavy granular fertilizers and pelleted lime.

Technical Specifications (Model 9520P-IC)

- **Product Family:** IronCraft 9500 Series
- **Hopper Material:** High-Density Polyethylene (500 lb Capacity)
- **Hitch Compatibility:** Category 1 (Cat 1) 3-Point Hitch
- **PTO Driven:** Standard 540 RPM operation
- **Spreading Mechanism:** Adjustable Multi-Fin Steel Disc

Primary Large-Scale Property Applications

- **Commercial Pasture Management:** Maintain optimal nutrient levels across expansive hay fields and livestock grazing land.

- **Large Estate & Turf Care:** Efficiently fertilize multi-acre residential lawns and corporate campuses.
 - **Food Plot Establishment:** Ideal for land managers looking to plant large-scale wildlife food plots in a single pass.
 - **Municipal Park Maintenance:** Provide a uniform application of fertilizer or seed to public sports fields and recreation areas.
-
