Product Description

IronCraft 9510PTP-IC: 180 Poly Hopper ATV Pull-Type Spreader

The **IronCraft 9510PTP-IC** is a versatile **Tow-Behind Poly Hopper Spreader** designed for maximum efficiency behind your ATV, UTV, or lawn tractor. This 180-capacity pull-type spreader is the perfect solution for land managers and homeowners who need professional-grade fertilizer and seed distribution without the requirement of a 3-point tractor hitch.

Featuring a high-density, **corrosion-resistant polyethylene hopper**, the 9510PTP-IC is built to handle aggressive granular and crystalline fertilizers that would traditionally rust a steel unit. Its towable design allows for easy maneuvering through tight trails and across varied terrain, making it the go-to tool for food plots and expansive estates.

Precision Towable Distribution & Features

- **Durable Poly Hopper:** The heavy-duty plastic construction ensures a long service life by resisting chemical corrosion from fertilizers and moisture.
- **High-Velocity Spreading Disc:** Equipped with a multi-fin disc designed for a wide, even broadcast pattern across your fields or lawn.
- **All-Terrain Versatility:** The pull-type configuration makes it compatible with almost any vehicle featuring a standard hitch, from side-by-sides to utility quads.
- **Multi-Material Capability:** Effortlessly spreads everything from fine grass seed and pelleted lime to coarse granular fertilizers.

Technical Specifications (Model 9510PTP-IC)

- **Product Family:** IronCraft 9500 Series
- **Hopper Capacity:** 180 (Polyethylene)
- **Hitch Type:** Pull-Type / Tow-Behind
- **Vehicle Compatibility:** ATV, UTV, and Garden Tractors
- **Spreading Mechanism:** Precision Steel Fin Disc

Primary Land Management & Property Applications

- **Wildlife Food Plots:** Easily navigate wooded trails to establish and maintain remote food plots for deer

and other wildlife.

- **Pasture Overseeding:** Quickly broadcast seed across small pastures or paddocks to improve forage density.
 - **Large Residential Lawns:** Maintain thick, green turf on properties where a full-sized tractor is too heavy or cumbersome.
 - **Winter Salt & Sand Application:** Use during the colder months to spread grit or salt on private roads and icy driveways.
-
