Product Description

IronCraft BRF-200: 79" Heavy-Duty Offset Flail Mower

The **IronCraft BRF-200** is an elite, multi-purpose **offset flail mower** engineered for high-horsepower tractors ranging from **70-100 PTO HP**. This heavy-duty machine is designed to shred grass, stubborn weeds, and brushwood up to **2" in diameter**, even across challenging and uneven terrain.

As a premier choice for **maintaining ditch banks, ponds, and orchards**, the BRF-200 provides a robust yet maneuverable solution for clearing along fence lines. Its specialized hydraulic articulation allows operators to reach steep embankments and tight areas that traditional mowers simply cannot access.

Key Performance & Maneuverability Features

- **Extreme Articulation:** Offers a massive tilt range of 90° upward and 65° downward for vertical hedge trimming and sloped bank clearing.
- **Hydraulic Right-Hand Offset:** Efficiently offsets to the right to keep the tractor on stable ground while reaching over edges.
- **Aggressive Mulching Power:** Equipped with 16 high-mass hammers (4.9" x 1.7") designed for maximum impact and debris reduction.
- **Industrial-Grade Drivetrain:** Features a Series 6 PTO drive shaft and a 4-belt side transmission for reliable power transfer under heavy loads.

Technical Specifications (Model BRF-200)

- **Working Width:** 79" cutting path.
- **HP Requirement:** 70 - 100 PTO HP.
- **Rotor & Roller:** Features a 6.3" diameter rotor and a massive 7.6" diameter rear roller for superior stability.
- **Hydraulic Requirements:** Requires 2 sets of rear tractor remotes for full functionality.
- **Operating Weight:** Robust 1,719 lbs for increased structural integrity and down-pressure.

Build Quality & Hardware

- **Hammer Configuration:** 16 Heavy-duty hammers (available with hammers only).
- **Side Transmission:** 4-belt drive system built to absorb shock and protect the gearbox.

- **Industrial Utility:** Perfectly suited for municipal roadside maintenance, vineyards, and large-scale agricultural use.

Ideal Applications

- **Ditch & Embankment Maintenance:** The 65° downward tilt makes it a leading choice for steep bank management.
 - **Orchard Rows:** Reach under low-hanging canopies while the tractor remains centered in the row.
 - **Fence Lines & Pond Edges:** Use the hydraulic offset and 90° upward tilt for precision edging and vertical brush clearing.
-
