### Product Description

#### IronCraft IC-AUXKIT: 3-Point Self-Contained Auxiliary PTO Hydraulic Kit

The **IronCraft Auxiliary PTO Hydraulic Kit (IC-AUXKIT)** is a premium, self-contained solution designed to provide independent hydraulic power to your 3-point implements. Engineered for tractors starting at **15 HP**, this kit is the perfect upgrade for operators who need consistent, high-volume hydraulic flow without taxing the tractor's internal hydraulic system.

At the heart of the system is a high-capacity **20-gallon reservoir tank**, ensuring your equipment stays cool and lubricated during extended work cycles. Whether you are running hydraulic motors or high-demand cylinders, this **11.4 GPM pump kit** delivers the "plug-and-play" power needed for professional-grade performance.

#### Advanced Power & Monitoring Features

- **High-Flow Performance:** Delivers a steady 11.4 GPM flow range, specifically optimized for implements requiring 9-14 GPM.
- **Large 20-Gallon Reservoir:** Provides ample fluid volume to prevent overheating and aeration during heavy-duty applications.
- **Integrated Fluid Monitoring:** Features a built-in oil sight glass and temperature gauge for real-time monitoring of fluid levels and thermal health.
- **Self-Contained 3-Point Design:** Easily mounts to your tractor's rear hitch, keeping your hydraulic power source compact and portable.
- **Optimal Thermal Management:** The large tank surface area and high fluid capacity ensure the system runs at peak efficiency in all weather conditions.

#### Technical Specifications (Model IC-AUXKIT)

- **Product Family:** Auxiliary PTO Hydraulic Kit
- **Flow Rate:** 11.4 GPM
- **Reservoir Capacity:** 20 Gallon Tank
- **Horsepower Requirement:** 15 HP Minimum
- **Operating Weight:** 400 lbs (When fluid-filled)

- **Compatibility:** Designed for units requiring 9 - 14 GPM flow

### High-Demand Hydraulic Applications

- **Backhoe Attachments:** Provide the dedicated flow and pressure required for fast, responsive digging and swinging.
  - **Hydraulic Wood Splitters:** Power large-diameter cylinders for splitting tough logs without slowing down your tractor's steering or loader.
  - **PTO-Driven Motors:** Run hydraulic sweepers, augers, or mowers that require a constant, uninterrupted flow of oil.
  - **Vintage Tractor Upgrades:** Add modern hydraulic capabilities to older tractors that lack sufficient factory internal pumps.
-
