Product Description

IronCraft IC-HFAUXKIT: High-Flow Auxiliary PTO Hydraulic Kit

The **IronCraft Auxiliary PTO Hydraulic Kit** is a professional-grade, self-contained solution for tractors requiring additional hydraulic power. Engineered to provide a robust **21 GPM flow rate**, this 3-point hitch kit allows you to run high-demand implements—such as hydraulic motors, backhoes, and log splitters—on tractors with limited internal hydraulic capacity.

Designed for reliability and ease of use, the **IC-HFAUXKIT** features a massive **20-gallon reservoir tank** to prevent fluid overheating during extended operations. This completely independent system mounts to your tractor's rear 3-point hitch, drawing power directly from the PTO to provide a consistent, high-pressure oil supply.

Advanced Power & Control Features

- **High-Flow 21 GPM Pump:** Delivers the necessary volume to power industrial-grade hydraulic attachments that standard tractor pumps cannot support.
- **Integrated 20-Gallon Reservoir:** The large-capacity tank ensures ample fluid volume, significantly reducing the risk of aeration and overheating during heavy-duty cycles.
- **On-Board Monitoring:** Equipped with a built-in oil sight glass and temperature gauge for real-time monitoring of fluid levels and thermal performance.
- **Self-Contained 3-Point Design:** Easily attaches to your Category 1 or 2 hitch, keeping your tractor's internal hydraulic system dedicated to loader and steering functions.

Technical Specifications (Model IC-HFAUXKIT)

- **Hydraulic Flow Rate:** 21 Gallons Per Minute (GPM)
- **Power Requirement:** Minimum 15 HP Engine
- **Reservoir Capacity:** 20 Gallons
- **Total Operating Weight:** 400 lbs (When fluid-filled)
- **Mounting Type:** 3-Point Hitch Mounted
- **System Type:** Self-Contained High-Flow Pump Kit

Primary Commercial & Agricultural Applications

- **High-Demand Implement Power:** Run hydraulic post drivers, heavy-duty wood splitters, and orbital motors with ease.
 - **Tractor Hydraulic Upgrades:** Modernize older utility tractors that lack the factory GPM flow needed for contemporary attachments.
 - **Remote Hydraulic Tools:** Provide a dedicated power source for hydraulic chainsaws, pruners, or shop tools used in the field.
 - **Loader & Backhoe Support:** Supplement your tractor's existing hydraulics to improve the cycle times of front-end loaders and rear-mounted backhoes.
-
