Product Description

IronCraft QH Series: Heavy-Duty Category 2 Quick Hitch Adapter

The **IronCraft QH-2** is a professional-grade **Category 2 Quick Hitch** designed to maximize efficiency for operators of larger utility tractors. This robust adapter system allows you to transition between 3-point attachments in seconds, eliminating the manual labor and downtime typically required to pin and align heavy implements.

Engineered for a precision fit, the QH-2 is compatible with a wide range of **Category 2 implements**, including high-torque PTO-driven attachments. Whether you are switching from a large rotary cutter to a heavy-duty box blade, this system provides a rock-solid connection that is built to handle the increased stresses of higher-horsepower machines.

Efficiency & Professional Performance Features

- **Rapid Tool Swapping:** Reduce attachment and release times to mere seconds, keeping your tractor moving and your projects on schedule.
- **Spring-Loaded Locking Mechanism:** Features high-tension locking handles that keep your implements securely fastened and prevent accidental decoupling during heavy operation.
- **Adjustable Top Link Hook:** The versatile hook height can be adjusted to accommodate varying implement mast dimensions, ensuring a level and secure fit across different brands.
- **Included Adapter Bushings:** Comes standard with a dedicated set of bushings to ensure a proper, slop-free connection between your hitch and attachment pins.

Technical Specifications (Model QH-2)

- **Hitch Compatibility:** Category 2 (Cat 2)
- **Product Family:** IronCraft QH Series Quick Hitch
- **Dimensions:** 37-1/4" x 19-1/2" x 4"
- **Mounting Style:** Standard 3-Point Quick Attach
- **Build Quality:** Reinforced steel construction for high-torque utility applications

Primary Commercial & Large Property Applications

- **Large-Scale Farming:** Rapidly switch between tillage tools, mowers, and sprayers during tight

weather windows.

- **Municipal Grounds Maintenance:** Streamline the management of public parks and roadsides by swapping implements without leaving the tractor area for extended periods.
 - **Construction & Site Prep:** Move from grading to clearing quickly by utilizing the quick-attach functionality for box blades and landscape rakes.
 - **Industrial Utility Work:** Provide a safer, more efficient hitching solution for employees managing large tractor fleets.
-
